Comparative Biochemistry and Physiology

Editor

Professor G. A. KERKUT, Department of Physiology and Biochemistry, University of Southampton, Southampton SO9 3TU, England (Executive Editor)
(Tel: 0703-594341; Fax: 0703-594319)

Members of the Honorary Editorial Advisory Board

T. H. BULLOCK (La Jolla)
C. B. COWEY (Guelph)
R. FÄNGE (Göteborg)
E. FLOREY (Konstanz)
W. S. HOAR (Vancouver)
H. KINOSITA (Saitama)
E. KREPS (Leningrad)
O. LOWENSTEIN (Birmingham)
C. MANWELL (Adelaide)
H. S. MASON (Portland)
C. L. PROSSER (Urbana)
J. ROCHE (Paris)
B. T. SCHEER (Santa Barbara)
C. A. VILLEE (Massachusetts)
G. WALD (Harvard)
J. H. WELSH (Maine)

Publishing, Subscription and Advertising Offices: Pergamon Press plc, Headington Hill Hall, Oxford OX3 0BW, England (Tel: 0865-64881).

North America: Pergamon Press Inc., Maxwell House, Fairview Park, Elmsford, NY 10523, USA.

Annual Subscription Rates 1990 (including postage and insurance)

Annual institutional subscription rate (1990): combined subscription, DM 6120.00. Part A, Comparative Physiology DM 2590.00; Part B, Comparative Biochemistry DM 2590.00; Part C, Comparative Pharmacology and Toxicology DM 1640.00.

2 year institutional rate (1990/91): combined subscription, DM 11628.00. Part A, DM 4921.00; Part B, DM 4921.00; Part C, DM 3116.00.

Personal subscription rate for those whose library subscribes at the regular rate (1990): combined subscription, DM 460.00. Part A, Comparative Physiology DM 220.00; Part B, Comparative Biochemistry DM 220.00; Part C, Comparative Pharmacology and Toxicology DM 175.00. Parts A and B: Three volumes of each part per year, four issues per volume. Part C: Three volumes per year, two issues per volume. Prices are subject to change without notice.

Microform Subscriptions and Back Issues

Back issues of all previously published volumes, in both hard copy and on microform are available direct from Pergamon offices.

CONTENTS OF 96B

Vol. 96B, No. 1.

Mini-Reviews

Zulema Luisa Coppes, Silvia de Vecchi, Elizabeth Ferreira and Mónica Hirschhorn 1 Multilocus isozyme systems in fishes

Christian Schwabe and Erika E. Büllesbach 15 Relaxin

General Papers

Zulema Luisa Coppes 23 Isozymes of soluble malate dehydrogenase (s-MDH) in fishes of the subclasses Chondrichthyes and Actinopterygii

Zulema Luisa Coppes 33 Divergence of duplicate genes in three sciaenid species (Perciformes) from the south coast of Uruguay

Lawrence K. Duffy, Rebecca Reynolds and John P. Harrington 41 Partial amino acid sequences of several globin chains from the sockeye salmon, *Oncorhynchus nerka*

L. H. Teo, Zahara Lateef and Y. K. Ip 47 Some properties of the sucrase from the digestive gland of the green mussel *Perna viridis* L.

Claudia B. González, María L. Cantore, Carlos P. Lantos and Susana Passeron 53 Cyclic AMP as an intracellular messenger of gonadotrophin —induced steroidogenesis during the development of the embryonic chick ovary

Walter R. Terra, Francisco J. A. Lemos and Beatriz P. Jordão 59 Enzyme depletion in insect feeding experiments: fact or artifact?

Pablo Garcia de Frutos, Lluis Bonamusa, Felipe Fernandez and Isabel V. Baanante 63 Fructose 2,6-bisphosphate in liver of *Sparus aurata*: influence of nutritional state

James Flanigan, Philip Withers, Kenneth Storey and Michael Guppy 67 Changes in enzyme binding and activity during aestivation in the frog *Neobatrachus pelobatoides*

Douglas R. Tocher and James R. Dick 73 Incorporation and metabolism of (*n*-3) and (*n*-6) polyunsaturated fatty acids in phospholipid classes in cultured Atlantic salmon (*Salmo salar*) cells

S. Watabe, S. Sri Kantha, K. Hashimoto and H. Kagawa 81 Phosphorylation and immunological cross-reactivity of paramyosin: a comparative study

S. Sri Kantha, S. Watabe and K. Hashimoto 89 Immunological comparison between the paramyosins from adductor muscle of bivalves and from foot muscle of a gastropod

Motohiko Yamazaki and Yoshiyuki Ichikawa 93 Crystallization and comparative characterization of reduced nicotinamide adenine dinucleotide phosphate-ferredoxin reductase from sheep adrenocortical mitochondria

María J. López-Zabalza, Susana Sanz, Ana Iriarte, Natalia López-Moratalla and E. Santiago 101 Modification of skeletal S-1 with fluorescein isothiocyanate

Takeshi Suzuki, Toshiyuki Hirano and Takaaki Shirai 107 Distribution of extractive nitrogenous constituents in white and dark muscles of fresh-water fish

Frederick C. Kauffman, Michael Whittaker, Mostafa Z. Badr and Ronald G. Thurman	113	Effect of epinephrine on glycogen phosphorylase-*a* in various preparations of rat liver
Aldo Focesi, Jr, Satie H. Ogo and Maria S. A. Matsuura	119	Dimer–tetramer transition in hemoglobins from *Liophis miliaris*—II. Evidence with the stripped proteins
Montserrat Daban, Elba Morriconi, Harold E. Kasinsky and Manel Chiva	123	Characterization of the nuclear sperm basic proteins in one archaeogastropod: comparison of protamines between species
Franck Chesnel, Jean Joly, Daniel Boujard and Yves Valotaire	129	Purification, dosage, and cyclic variations of vitellogenin in the ovoviviparous amphibian, *Salamandra salamandra*
Michèle Regnault and Claudette Faidy	137	Changes in GDH activity in the chela muscle of *Cancer pagurus* during the annual cycle. Effect of the moult stage
Ulrike Knels and Hagen Bretting	147	Structural studies on the galactan from the snail *Helix pomatia*
R. G. Elkin, K. V. Wood and L. R. Hagey	157	Biliary bile acid profiles of domestic fowl as determined by high performance liquid chromatography and fast atom bombardment mass spectrometry
R. W. Rosebrough and M. F. Von Vleck	163	Glucose production and glycogen cycle enzyme activities in avian liver explants: procedural optimization
Masako Mizuno, Koji Yashiro, Yasunaga Kameyama, Shigeo Hayashi, Yuzuru Sakashita and Yutaka Yokota	171	Biochemical and physical analysis of subcellular membranes in rat parotid gland enlarged by chronic isoproterenol administration
Torstein Hølleland and David W. Towle	177	Vanadate but not ouabain inhibits $Na^+ + K^+$-ATPase and sodium transport in tight inside-out native membrane vesicles from crab gill (*Carcinus maenas*)
R. C. Noble, D. C. Deeming, M. W. J. Ferguson and R. McCartney	183	Changes in the lipid and fatty acid composition of the yolk during embryonic development of the alligator (*Alligator mississipiensis*)
Louis G. D'Alecy, Edward F. Lundy, Matthew J. Kluger, Christian T. Harker, Daniel R. LeMay and Marshal Shlafer	189	β-Hydroxybutyrate and response to hypoxia in the ground squirrel, *Spermophilus tridecimlineatus*
Christine Nicolas, Yves Demarne, Marie-José Lecourtier and Claude Lhuillery	195	Dependence between 5′-nucleotidase activity and phosphatidylcholine content in pig adipocyte plasma membrane. Absence of relationship with membrane physical state
Shiquan Wang, W. C. Foote and T. D. Bunch	201	Genetic variability in domesticated and wild sheep based on blood protein characters
Arthur F. Stucchi, Jose M. Ordovas, Glenn T. Shwaery and Samuel C. Smith	209	Comparative molecular properties of swine and human very low density lipoproteins—apoproteins E and C

Vol. 96B, No. 2.

General Papers

Alcir Luiz Dafré and Evaldo Reischl	215	High hemoglobin mixed disulfide content in hemolysates from stressed shark
Iciar Martinez, Ragni Ofstad and Ragnar L. Olsen	221	Electrophoretic study of myosin isoforms in white muscles of some teleost fishes
A. I. Papadopoulos, C. J. Gaitanaki and I. D. Beis	229	Pyruvate kinase isoenzymes in marine invertebrates: a comparative study by the use of monoclonal antibodies
Gene D. McDonald and G. Barrie Kitto	235	Glycosylation of invertebrate hemoglobins

Yasuhisa Shinomura, John Eng, Satish C. Rattan and Rosalyn S. Yalow	239	Opossum (*Didelphis virginiana*) "little" and "big" gastrins
K. Böttcher, D. Siebers and W. Becker	243	Localization of carbonic anhydrase in the gills of *Carcinus maenas*
Michiaki Yamashita and Shiro Konagaya	247	Purification and characterization of cathepsin L from the white muscle of chum salmon, *Oncorhynchus keta*
Yasushi Sugimoto, Akira Saito, Eiichi Kosegawa, Katsumi Koga and Hiroshi Fujii	253	Comparison of egg and embryo proteins and a trial to detect proteolytic activities in eggs of *Bombyx mori*
Fulvia Basaglia, Maria Gabriella Marchetti and Germano Salvatorelli	257	Genetic, developmental and comparative analysis of LDH, MDH and GPI isozymes in the sheepshead bream (*Diplodus puntazzo* Gm.)
A. J. Anderson, A. H. Arthington and S. Anderson	267	Lipid classes and fatty acid composition of the eggs of some Australian fish
Uwe Murawski, Klaus Kriesten and Heinz Egge	271	Age-related changes of lipid fractions and total fatty acids in liver lipids and heart lipids of female and male rats aged 37–1200 days (liver) and 331–1200 days (heart)
T. Brittain	291	Co-operative functioning of the dimeric haemoglobin obtained from the radular muscle of the amphineurian mollusc *Amaurochiton glaucus*
A. Rodríguez-Burgos	297	Soluble fetoproteins in chorioallantoic membrane from chick embryo (*Gallus domesticus*)
Karl E. Espelie, C. Wayne Berisford and Donald L. Dahlsten	305	Cuticular hydrocarbons of geographically isolated populations of *Rhopalicus pulchripennis* (Hymenoptera: Pteromalidae): evidence for two species
P. D. Eckersall and J. G. Conner	309	Plasma haptoglobin in cattle (*Bos taurus*) exists as polymers in association with albumin
Gwynne H. Little and Antonio Flores	315	Changes in the rate of production of superoxide anion in tails of *Rana catesbeiana* tadpoles during spontaneous and triiodothyronine-induced metamorphosis
S. E. Osman, K. M. Kandeel and J. L. Tanagho	319	Comparative biochemical studies on the fat bodies of *Blaps sulcata* Laporte and *Blaps polychresta* Forskål
Asbjørn Gildberg, Ragnar L. Olsen and Jon B. Bjarnason	323	Catalytic properties and chemical composition of pepsins from Atlantic cod (*Gadus morhua*)
W. Cochrane and M. P. Rogers	331	Sensitivity of freshly isolated ovine adipocytes to inhibition of lipolysis by insulin
Norimasa Matsuoka and Yuri Nakamura	335	Enzyme variation within the population of the sea-urchin, *Glyptocidaris crenularis*, from Japanese waters
William G. Brogdon and Ann M. Barber	339	Microplate assay of glutathione *S*-transferase activity for resistance detection in single-mosquito triturates
Walter J. Diehl	343	Apparent differences in kinetic properties among isozymes in *Eisenia foetida* (Oligochaeta: Lumbricidae)
Kazuaki Hayasaka, Maki Sato, Hiroshi Mitani and Akihiro Shima	349	Transfection of cultured fish cells RBCF-1 with exogenous oncogene and their resistance to malignant transformation
Seiichi Ando, Kyoichi Osada, Mutsuo Hatano and Mineo Saneyoshi	355	Metabolism of astaxanthin in muscle and ovary from brook trout *Salvelinus fontinalis*

George Loo, Elliott Berlin and Patricia C. Allen 361 Effect of feed deprivation on hepatic membrane and lipoprotein fluidity and binding of lipoproteins to hepatic membranes in the chick (*Gallus domesticus*)

Rossana D'Avino, Carla Caruso, M. Eugenia Schinina, Bruno Rutigliano, Mario Romano, Laura Camardella, Francesco Bossa, Donatella Barra and Guido di Prisco 367 Hemoglobin from the Antarctic fish *Notothenia coriiceps neglecta*. Amino acid sequence of the beta chain

M. Weiss and Ruo-Jun Xu 375 Estrogen receptors in the adrenal cortex of the possum (*Trichosurus vulpecula*)

Yoshinori Okada and Yukio Yokota 381 Purification and properties of cathepsin B from sea urchin eggs

A. Cristina Puviani, Celestina Ottolenghi, M. Emilia Gavioli, Elena Fabbri and Luigi Brighenti 387 Action of glucagon and glucagon-like peptide on glycogen metabolism of trout isolated hepatocytes

Rosa Cicero, Anna Gallone, Immacolata Maida and Giuseppe Pintucci 393 Effects of copper on the tyrosinase of liver pigment cells from *Rana esculenta* L.

Yoshiki Uchida, Takashi Koyama and Akira Hachimori 399 Stability and conformation of porcine phosphofructokinase M and L

J. Harms, J. Moal, J. R. Le Coz, J. Y. Daniel and J. F. Samain 405 Nucleotide composition and energy charge in growing and starving zoea I of *Carcinus maenas* (Decapoda: Portunidae)

S. Takase and T. Goda 415 Developmental changes in vitamin A level and lack of retinyl palmitate in chick lungs

H. R. Gamble, J. P. Purcell and R. H. Fetterer 421 Biochemical characterization of cuticle polypeptides from the infective larvae of *Haemonchus contortus*

Vol. 96B, No. 3.

Mini-Review

U. Anthoni, P. H. Nielsen, M. Pereira and C. Christophersen 431 Bryozoan secondary metabolites: a chemotaxonomical challenge

General Papers

Massimo Dell'Agata, Gianna Pannunzio, Margherita Annicchiarico, Annamaria Coscarella and Alessandro Ferracin 439 Unusual steady-state kinetic properties of a chilopod enzyme: L(+)lactate dehydrogenase purified from *Scolopendra cingulata*

Evandro Fioretti, Mauro Angeletti, Donatella Barra and Franca Ascoli 445 Kunitz-type proteinase inhibitors in sheep and ox

Reiji Yoshinaka, Shohshi Mizuta, Yoshiaki Itoh and Mamoru Sato 451 Two genetically distinct types of collagen in kuruma prawn *Penaeus japonicus*

Zakia El Hachimi, M'hamed Tijane, Gérard Boissonnet, Abdelaziz Benjouad, Michel Desmadril and Jeannine M. Yon 457 Regulation of the skeletal muscle metabolism during hibernation of *Jaculus orientalis*

Shigenobu Umeki and Dorothy M. DeLisle 461 A microtechnique for neutrophil respiratory burst oxidase in a cell-free system—characterization of oxidase activation system

Eiji Yamashita and Takao Matsuno 465 A new apocarotenoid from the sea hare *Aplysia kurodai*

Louis Irwin and Karen Talentino 471 Brain ganglioside patterns and effect of thermal acclimation in North American salamanders

Hirosuke Oku, Tooru Nakanishi, Kazutoshi Kumamoto and Isao Chinen	475	Distribution of branched-chain fatty acid in the skin surface lipid of laboratory animals
Bangqiang Gong and Anthony P. Farrell	483	Comparison of blood and muscle levels of unsaturated fatty acids in parr and mature coho salmon
Satoshi Tamotsu and Yukitomo Morita	487	Blue sensitive visual pigment and photoregeneration in pineal photoreceptors measured by high performance liquid chromatography
D. Baum, G. Graser, M. Heib and G. Krampitz	491	Chicken growth hormone: cDNA-synthesis and base sequence
Theodore T. Herskovits, Mary G. Hamilton, Conset J. Cousins and Joseph S. Wall	497	Light-scattering and scanning transmission electron microscopic investigation of the hemocyanin of the bivalve, *Yoldia limatula* (Say)
Andrew Clarke, Janet H. Brown and Lesley J. Holmes	505	The biochemical composition of eggs from *Macrobrachium rosenbergii* in relation to embryonic development
Andrea Cavaggioni, John B. C. Findlay and Roberto Tirindelli	513	Ligand binding characteristics of homologous rat and mouse urinary proteins and pyrazine-binding protein of calf
Walter Horacio Jeckel, Julia Elena Aizpun de Moreno and Víctor Jorge Moreno	521	Changes in biochemical composition and lipids of the digestive gland in females of the shrimp *Pleoticus muelleri* (Bate) during the molting cycle
M. Alsharif, R. Apweiler, W. J. D. Whish, C. J. Branford White and R. V. Brunt	527	Identification of ADPR-transferase activity in the rat tapeworm, *Hymenolepis diminuta*
M. Sailer, A. Reuzel-Selke and R. K. Achazi	533	The calmodulin–protein–kinase system of *Mytilus edulis* catch muscle
J. E. Maruniak, S. E. Fiesler and P. M. McGuire	543	Susceptibility of insect cells and ribosomes to ricin
G. E. Pimentel and P. A. Rossignol	549	Age dependence of salivary bacteriolytic activity in adult mosquitoes
K. Hirayama, K. Fukuyama and W. L. Epstein	553	Angiotensin II-producing proteases from granulomatous tissue reaction in mice infected with *Schistosoma mansoni*
Maurice Aknin, Joseph Miralles and Jean-Michel Kornprobst	559	Sterol and fatty acid distribution in red algae from the Senegalese coast
Masato Kinoshita, Haruhiko Toyohara and Yutaka Shimizu	565	Induction of carp muscle multicatalytic proteinase activities by sodium dodecyl sulfate and heating
P. Grove Sørensen	571	Phospholipids and fatty acid esters from flounder (*Platichthys flesus* L.) erythrocyte plasma membrane and changes of the lipids from the membrane as a result of long term temperature acclimation
M. Samie, K. R. Wallbanks, J. S. Moore and D. H. Molyneux	577	Glycosidase activity in the sandfly *Phlebotomus papatasi*
Pietro Cenini, Domenica Carnicelli and Fiorenzo Stirpe	581	Effect of plant ribosome-inactivating proteins on ribosomes from various metazoan species
G. H. Sams, B. M. Hargis and P. S. Hargis	585	Isolation and characterization of a fatty acid binding protein in adipose tissue of *Gallus domesticus*
Isao Morishima and Teruo Ueno	591	Structural and kinetic properties of glycogen phosphorylase a from fat body of the silkworm, *Bombyx mori*

Eser Ayanoglu, Michele Rizzolio, Stacey Beaulieu, Julie Roberts, Orhan Oz and Carl Djerassi 597 Covalently bound fatty acids in membrane proteins of some sponges

Motoyuki Sumida, Xi Lin Yuan, Young-Il Mah, Hajime Mori and Fujiyoshi Matsubara 605 Changes in kinetic parameters and total activity of midgut sucrase in the silkworm, *Bombyx mori* during larval–pupal–adult development

Enrique Brandan, Mauricio González, Roberto González-Plaza and Nibaldo C. Inestrosa 613 Increase of macromolecule synthesis after hatching of *Concholepas concholepas* veliger larvae: effect of sulfate in the synthesis of proteoglycans

Lars Sottrup-Jensen, Wolfgang Borth, Martin Hall, James P. Quigley and Peter B. Armstrong 621 Sequence similarity between α_2-macroglobulin from the horseshoe crab, *Limulus polyphemus*, and proteins of the α_2-macroglobulin family from mammals

Vol. 96B, No. 4.

Mini-Reviews

Enzo Ottaviani, Anna Maria Bolognani Fantin and Lorenzo Bolognani 627 Muramic acid as a glycoconjugate component in Mollusca Gastropoda

Mark F. P. Heschl and David L. Baillie 633 The hsp70 multigene family of *Caenorhabditis elegans*

S. Watabe and D. J. Hartshorne 639 Paramyosin and the catch mechanism

General Papers

M. J. Cano, M. Desco and P. Garcia-Barreno 647 Normal biochemistry values in baboons (*Papio c. cinocephalus*)

Francis L. Rose, Ralph Paxton and Charles H. Britton, III 651 Identification of an ovalbumin-like protein in egg-white of turtle and alligator

James Grogan, Ata Shirazi and George Taborsky 655 Phosphorus nuclear magnetic resonance of diverse phosvitin species

Kazuo Asaoka and Masaru Tanokura 665 Purification and characterization of the parvalbumin from monkey skeletal muscle

L. H. Teo, A. M. Hammond, J. P. Woodring and H. W. Fescemyer 671 Study of some aspects of glycosidases present in the velvetbean caterpillar, *Anticarsia gemmatii*

Jacqueline Sinclair, Linda Lambrecht and E. Lucile Smith 677 Hepatic alcohol dehydrogenase activity in chick hepatocytes towards the major alcohols present in commercial alcoholic beverages: comparison with activities in rat and human liver

Nget-Hong Tan and Gnanajothy Ponnudurai 683 A comparative study of the biological properties of venoms from snakes of the genus *Vipera* (true adders)

Norma K. Jenner and Eric H. Holmes 689 Glycolipid biosynthesis in rainbow trout: characterization of a $\beta 1 \rightarrow 4$galactosyltransferase independent from regulation by α-lactalbumin

Seymour Zigman, Teresa Paxhia, Marjorie Lou and N.-T. Yu 697 Comparative study of lens proteins of gray squirrel and human

Paul J. Weldon, Robert T. Mason, Michael J. Tanner and Thomas Eisner 705 Lipids in the Rathke's gland secretions of hatchling Kemp's ridley sea turtles (*Lepidochelys kempi*)

Nobumichi Tsushima and Masahiro Yamada 709 Comparison of δ-aminolaevulinic acid dehydratase activity in chick liver during sex steroid hormone dependent primary and secondary stimulation

L. H. Teo, T. W. Chen and L. L. Tan	715	The proteases of the common Malayan toad *Bufo melanostictus* Schneider
Anita Viga and Otto Grahl-Nielsen	721	Genotypic and phenotypic fatty acid composition in the tissues of salmon, *Salmo salar*
Nora Maria Navone, Cesar Francisco Polo, Alberto Luciano Frisardi and Alcira Maria Del Carmen Batlle	729	Mouse mammary carcinoma δ-aminolevulinate dehydratase
Michiaki Yamashita and Shiro Konagaya	733	Purification and characterization of cathepsin B from the white muscle of chum salmon, *Oncorhynchus keta*
Calogero Canicattí and Jürg Tschopp	739	Holozyme A: one of the serine proteases of *Holothuria polii* coelomocytes
A. E. Scobbie and I. M. Mackie	743	The use of sodium dodecyl sulphate–polyacrylamide gel electrophoresis in species identification of fish eggs
Nin-Nin Chuang	747	A neutral beta-galactosidase from the hepatopancreas of the shrimp *Penaeus monodon* (Crustacea: Decapoda): dimeric and sialyated
Franck Talmont and Bernard Fournet	753	Chemical composition of mucins from deep sea hydrothermal vent tubiculous annelid worms
K. R. Lynn	761	Chitinases and chitobiases from the American lobster (*Homarus americanus*)
Gene R. Herzberg and Maria Rogerson	767	Tissue distribution of lipogenesis *in vivo* in the common murre (*Uria aalge*) and the domestic chicken (*Gallus domesticus*)
K.-G. Collatz and M. Horning	771	Age dependent changes of a biochemical rhythm—the glycolytic oscillator of the blowfly *Phormia terraenovae*
Mitchell Fry, Elaine Webb and Mary Pudney	775	Effect of mitochondrial inhibitors on adenosinetriphosphate levels in *Plasmodium falciparum*
Ehud Ilan, Abdussalam Azem and Ezra Daniel	783	Structural characterization and oxygen binding properties of extracellular hemoglobin from the marine polychaete *Eurythoe complanata*
Nin-Nin Chuang and Bei-Chia Yang	787	A comparative study of alkaline phosphatases among human placenta, bovine milk, hepatopancreases of shrimp *Penaeus monodon* (Crustacea: Decapoda) and clam *Meretrix lusoria* (Bivalvia: Veneidae): to obtain an alkaline phosphatase with improved characteristics as a reporter
Prabhakara H. Shetty, Bernard Fried and Joseph Sherma	791	Sterols in the plasma and digestive gland–gonad complex of *Biomphalaria glabrata* snails, fed lettuce versus hen's egg yolk, as determined by GLC
Franz Bucher	795	Organ patterns and natural fluctuations of blood enzymes of rainbow trout (*Salmo gairdneri* Rich.)
Miyuki Tsushima and Takao Matsuno	801	Comparative biochemical studies of carotenoids in sea-urchins—I
G. P. Serrazanetti, L. S. Conte and R. Baraldi	811	Sterol content in muscular tissue of *Squilla mantis*
E. Hebanowska, E. Maliński, A. Latowska, E. Dubis, K. Pihlaja, P. Oksman, J. Nawrot and J. Szafranek	815	A comparison of cuticular hydrocarbons of larvae and beetles of the *Tribolium destructor*

A. K. Al-Ali, A. Rehaimi, R. Saba and D. M. Power 821 A comparative study of glycosylated haemoglobin level in the Arabian camel (*Camelus dromedarius*) during different seasons

Jose Manuel Diez and John Davenport 825 Energy exchange between the yolk and embryo of dogfish (*Scyliorhinus canicula* L.) eggs held under normoxic, hypoxic and transient anoxic conditions

Exploring the Vital Link Between Life Sciences . . .

BIORHEOLOGY

The Official Journal of the International Society of Biorheology

Editors-in-Chief:

Alfred. L. Copley, Polytechnic University, Brooklyn, NY 11201, USA

Alexander Silberberg, Polymer Dept., The Weizmann Institute of Science, Rehovot, Israel

BIORHEOLOGY features articles on deformation and flow as it occurs in biological systems under physiological and pathological conditions. The studies presented involve the rheological character and properties of biological materials, their dependence on molecular structure and organization, and their variation with age and pathology. BIORHEOLOGY explores the relationships between these properties—how they are matched to each other in the biological system and how they are used, rheologically and organizationally, to function together with the muscular and other motility inducing elements which constitute the living system.

A SELECTION OF ARTICLES

CHROMATOGRAPHIA

An International Journal for Rapid Communication in Chromatography and Associated Techniques

Editors: **H ENGELHARDT,** *Angewandte Physikalische Chemie, Universität des Saarlandes, D-6600 Saarbrücken, FRG,* **G SCHOMBURG,** *Max Planck Institut für Kohlenforschung, Kaiser Wilhelm Platz 1, D-4330 Mülheim/Ruhr, FRG,* **L S ETTRE,** *PO Box 2175, Belden Avenue Station, Norwalk, CT 06852, USA* and **R STOCK,** *Department of Chemistry, Sultan Qaboos University, Muscat, Oman*

Present-day technology makes necessary the rapid exchange of information among professionals in the field of chromatography. Because of the difficulty in solving certain analytical problems quickly and economically using only one of the chromatographic methods, the combined use of varied techniques, such as gas chromatography and mass spectroscopy, yields more exact results.
Chromatographia is a monthly, international journal that meets the vital demand for the quick spread of accurate, concise information concerning chromatography and related fields. This publication offers relevant papers in English, French or German, with accompanying titles, summaries and figure captions printed in all three languages.
Modern analytical problems place such great demands on the accuracy, sensitivity, speed and economy of the instruments that they can only be solved by close cooperation between theorists, users and instrument manufacturers, and to this end *Chromatographia* permits the rapid exchange of information.
It will be of interest to chromatographers, analytical chemists, organic and inorganic chemists, spectroscopists, biochemists and clinical chemists.

A Selection of Papers
K JINNO & M YAMAGAMI (Japan), Simultaneous flow rate and temperature programming based on computer-assisted retention prediction for the separation of PTH-amino acids in reversed-phase microcolumn liquid chromatography.
W SCHUSSLER (FRG), Automatic measurement of some common herbicides by LC using simultaneous UV detection and electrochemical detection in series.
S Y HUANG & C H LIN (PRC), Separation and purification of porcine pancreatic enzymes by serial operation of ion exchange and affinity columns.
K SUROWIEC & J RAYSS (Poland), The properties of poly(ethylene glycol) 20M layer on the surface of silanized support.
A V LARIN (USSR), Simulation of peak profiles in non-linear HPLC.
M ISAKSEN & G W FRANCIS (Norway), Preparative HPLC of carotenoids.
C TONG, Z L SHAN & P L ZHU (PRC), Preparation of silica-based cation-exchangers for use in ion chromatography.

BIOTECHNOLOGY ADVANCES

Research Reviews and Patent Abstracts

Executive Editor: **M MOO-YOUNG,** *Institute for Biotechnology Research, University of Waterloo, Ontario N2L 3GI, Canada*
Editors: **J D BU'LOCK,** *Department of Chemistry, University of Manchester, Manchester M13 9PL, UK,*
C L COONEY, *Department of Chemical Engineering, MIT, Cambridge, MA 02139, USA* and
B R GLICK, *Department of Biology, University of Waterloo, Waterloo, Ontario N2L 3GI, Canada*

In this review journal, biotechnology is viewed in a comprehensive context: a multidisciplinary field in which biological systems are developed and/or used for the provision of commercial goods or services. The journal is devoted to all areas of biotechnology including relevant aspects of its disciplinary underpinnings in biology, chemistry and engineering. The primary purpose is to provide regular, rapid but authoritative reviews of important advances in this field for students, researchers, managers and others in industry, government and academia. A timely series of research review papers, patent abstracts and summaries of special government reports on the principles and practices of biotechnology will be covered quarterly. The patent abstracts and government report summaries are selected by the Executive Editor. The review papers are generated from refereed manuscripts.

A Selection of Papers
B F ROETTGER & M R LADISCH (USA), Hydrophobic interaction chromatography.
J L ROLS & G GOMA (France), Enhancement of oxygen transfer rates in fermentation using oxygen-vectors.
R J WATSON (Canada), Molecular genetics of *Rhizobium meliloti* symbiotic nitrogen fixation.
J J HEIKKILA (Canada), Use of *Xenopus* oocytes to study the expression of cloned genes and translation of mRNA.

A New Patents section is included in this journal.

Information for Contributors

1. The journal will publish papers that contain the results of original research on the biochemistry, physiology and pharmacology of animals. Particular attention will be paid to those papers in which the subject is approached from a comparative point of view.

Part C of the journal deals with the study of the action of drugs and chemicals on cells, tissues and whole animals. In particular it is concerned with the differences between species, and organs, in their responses to drugs. The section will carry papers of interest to workers on insecticides, molluscides and antiprotozoan drugs.

In addition, basic research will be published on nerve muscle transmitters, nerve/nerve transmitters and other pharmacological studies on the simpler animals. Comparative biochemical and pharmacological studies will also be published.

2. English is the preferred language for papers.

3. Original communications should be sent to the Editor:

Professor G. A. KERKUT (Comparative Biochemistry and Physiology), Department of Physiology and Biochemistry, University of Southampton, Southampton SO9 3TU, England.

4. Submission of a paper to the Editor will be held to imply that it has not previously been published: that it is not under consideration for publication elsewhere; and that if accepted for *Comparative Biochemistry and Physiology* it will not be published elsewhere in the same form, in English or in any other language, without the written consent of the Editor.

5. The typescript, in general, should follow the conventional form—introduction and literature, materials and methods, results, discussion, summary and references. The paper should be prefaced by an abstract appearing immediately after the title and the author's name. *This abstract should consist of numbered sentences that summarize the main facts and conclusions of the paper. Not more than* 100 *words should be used, and* 50 *words are preferable.*

6. Communications should be in the form of typescript, with the lines double spaced on one side of paper (approx. 10 in. × 8 in.) and a left-hand margin of not less than $1\frac{1}{2}$ in. The submission of two typescripts (an original and a carbon copy) will facilitate refereeing; if only one is submitted, it should be the original. In either case, the author should retain a copy for his own use.

7. Authors are requested to keep their communications as concise as possible. **To conserve space, the author should indicate those parts of the paper that might be printed in small type.** Footnotes should be avoided and italics should not be used for emphasis. A running head (shortened title at the top of each right-hand page of an article) of not more than 45 letters and spaces should be supplied for papers with long titles.

8. In general it is not necessary to publish all the individual results of replicated experiments. A statement of the number, their mean value, and some appropriate measure of their variability is usually sufficient. The methods of an analysis followed should be indicated, but statistical details such as tables of analysis of variance should be given only if they are relevant to the discussion. A statement that the difference between the mean value of two groups is statistically significant should include an indication of the level of significance attained.

9. In the interest of economy, and in order to avoid the introduction of errors, tables will be reproduced by photo-offset means directly from the authors' typed manuscript, and the following points should therefore be observed during their preparation:

(*a*) **Tables should be prepared for direct camera copy.** Refer to current tables in the journal, and arrange the spatial layout of your table to conform.

(*b*) Type should be clear and even.

(*c*) Tables, headings and legends should be typed on a separate sheet. Indicate on a Xerox copy of the table where the headings and the legends should be inserted.

(*d*) Insert heavy rules at the head and foot of each table, and fine rules below column headings.

(*e*) Leave the *minimum* space required to avoid confusion between columns.

(*f*) Genus and species names, and other words normally italicized, should be typed in italics or underlined.

For guidance on how best to prepare tables for photographic reproduction, and in case of difficulty, please contact the Photoreprographic Section of your institution who will give you assistance.

10. All necessary illustrations should accompany the typescript but should not be inserted in the text. All photographs, charts and diagrams are to be referred to as "Figs", and they should be numbered consecutively in the order in which they are referred to in the text.

(*a*) **Photographs, including photomicrographs, should be glossy prints and should be restricted to the minimum necessary.** Each should have, lightly written on the back, the author's name, the figure number and an indication of which is the top of the picture. Lines or lettering to appear on the photographs should be in **good quality stencil.**

(*b*) *Captions to figures* should be typed consecutively on a separate page or pages at the end of the paper. The caption or legend should be sufficient so that the tables or figures are intelligible without reference to the text. The same data should not be published in tables and figures.

(*c*) Authors are requested not to submit sheets of illustrations larger than foolscap size.

(*d*) Authors should note that all illustrations, diagrams and graphs should have the FINAL labelling ready for press.

11. The full Latin name of all animal species used in the investigation must be given.

12. Full references should be given at the end of the paper in alphabetical order and should include the names of the authors, the date of publication, the full title of the paper, title of the journal, volume number and the first and last page numbers. References to books should include the number of the edition, volume, relevant pagination, the name of the publisher and the town of publication. In the text a reference should be quoted by the author's name and the date placed in parentheses, as, for example: Smith (1960). Examples of full references are given below:

Ashby W. (1943) Carbonic anhydrase in mammalian issue. *J. biol. Chem.* **151,** 521–527.

Kogh A., Warren B. and Holt C. (1977) *Physiology of Capillaries*, 2nd edn, Vol. 1, pp. 67–75. Pergamon Press, Oxford.

13. Abbreviations. Only standard abbreviations should be used. Where specialized terms are given, a specific abbreviation should be indicated as a footnote to the paper.

14. Page proofs will be sent to the author, or to the first-mentioned author in papers of multiple authorship, for correction. Reprints and copies of the issue (at a specially reduced rate) may be purchased using the order form which will accompany the proofs.

15. **Corrections to the proofs must be restricted to printer's errors only. Other than those, substantial alterations may be charged to the author.**

16. **The original manuscript and diagrams will be discarded one month after publication unless the Publisher is requested to return original material to the author.**
